Quality Assurance Engineer and Business Analyst. I combine manual and automated testing (Playwright, Cypress, Postman, SoapUI) with requirements elicitation, user stories, acceptance criteria and process modelling (UML, PlantUML). A testing background helps catch edge cases already at the specification stage. In day-to-day work I use AI in an agentic approach: MCP servers, skills and preparing projects for Agent-Driven Development (Windsurf, Kilo, Cursor). Polish — native. English — B2.
